

CT1: CSE 203 - Object-Oriented Programming I: Java

Time: 25 min Mark: 20

Name: ID:

1. Write a Java program that accepts 3 integer inputs from the user and prints "equal" if all 3 numbers are equal, and "not equal" otherwise. If the numbers are not equal, find the highest number and print it.

[8]

2. What will be the output of the program below? Show your steps. [6]

```
int a = 3, b = 5;
int c = ++a;
System.out.println(++a);
System.out.printf("Output:%d\n", a++ * ++b);
```

3. Identify the errors in the code below and fix those errors. [6]

```
1 public class TestError {
2     public static void main(String[] args) {
3         int 2CtName = "CT2";
4         double score = "20";
5         System.out.println(score);
6     }
7 }
```
